STOP THE SPREAD PRINT & PLAY GAME RULE SHEET

Introduction

As elite data scientists of the Global Health Authority, your job is to track the infection, anticipate future Outbreaks in COVID19 infections, and travel around the world to deploy interventions and preventions to reduce the spread.

Set Up

- 1) Print all pages double sided.
- 2) Cut all pages and pieces into their individual cards.
You should have:
 - This Rulesheet
 - 6 Continents
 - 24 COVID Spread cards
 - 24 Global Response cards
 - 1 Global Infection Datafeed page
- 3) Place the 6 Continent cards in the centre of the table.
- 4) Place the COVID SPREAD and GLOBAL RESPONSE cards in separate shuffled decks, face down.
- 5) Grab a pen, and a calculator/phone for calculating.
You are now ready to play!

How to Play: Rounds

Follow these steps until you have completed 12 full rounds:

1. Draw Global Response cards so that each player has three.
 - i. *If you're playing solo, you can draw 6 cards per turn and use 2 per turn.*
2. Discuss your options with your team, and choose one card to play each, following the directions on the card.
 - i. *If your chosen card alters any of the numbers of Infected, enter the new total for that Continent into the Intervention Impact section for that turn on your Global Infection Datafeed sheet.*
3. Once your team has played this turn's card and recorded any changes, draw COVID Spread cards equal to the number of players, and place them on the Continents they affect.
 - i. *If you have placed a Lockdown card that negates the spread, discard both that card and the COVID card.*
 - ii. *If you're playing solo, you can draw 6 GR cards per turn and use two of them.*
4. Write any affected numbers in the COVID Impact section of that month and continent on your Global Infection Datafeed sheet.
5. Add the new totals for that month together, and colour in the appropriate boxes for that month on the Global Infected Population by Month graph on your Global Infection Datafeed sheet.
 - i. *You can also write in the previous months unchanged totals into the COVID Impact section for the other Continents that were not affected during this turn.*
6. Repeat these steps until you reach the end of Month 12.

Example:

CONTINENTAL INFECTION LEVEL BY MONTH

	NORTH AMERICA	SOUTH AMERICA	ASIA	AUSTRALASIA	AFRICA	EUROPE
1	Intervention Impact 100,000	Intervention Impact 10,000	Intervention Impact 50,000	Intervention Impact 5,000	Intervention Impact 20,000	Intervention Impact 20,000
2	Intervention Impact 100,000	Intervention Impact 200,000	Intervention Impact 50,000	Intervention Impact 5,000	Intervention Impact 20,000	Intervention Impact 20,000
3	Intervention Impact 100,000	Intervention Impact 200,000	Intervention Impact 50,000	Intervention Impact 5,000	Intervention Impact 20,000	Intervention Impact 200,000

How to Win

Single Player/Team Mode: Reach the end of the 12th month with global infections under 12,800,000.

Competitive Mode: The player with the lowest overall number of global infected at the end of month 12 wins.

GLOBAL INFECTION DATAFEED

As elite data scientists of the Global Health Authority, your job is to track the infection, anticipate future Outbreaks in COVID19 infections, and deploy interventions and preventions to reduce the spread. Use this sheet to track whether your preventions and treatments are working on a global scale.

GLOBAL INFECTED POPULATION BY MONTH

(Update by colouring in the appropriate rectangle to form a vertical bar, at the end of every month/round)
